# Directions

- These reinforcers are for quick and easy articulation practice. Each animal has a specific sound they are working on to motivate your students, but you can also let students pick the animal they like. There are 10 boxes to drag the stickers to. So, students can practice their word 5-10 times, then drag the sticker to the box. Once they fill it up, done!
- Use this document in Google slides, but NOT in presentation mode. You will not be able to drag the stickers in presentation mode.
- You can make a copy of the file to use each session, or you can create groups and save each one. You can also create a separate file of certain slides to assign to students. (FILE > MAKE A COPY > ENTIRE PRESENTATION or SELECTED SLIDES). I suggest keeping an original copy at all times!
- You can use “version history” to clear the stickers back to their original position by going to FILE > VERSION HISTORY > SEE VERSION HISTORY and then choose the earlier version.
